“With the loss of the radio station and cost of the paper and NOT being on social media, I do not feel informed, engaged or a sense of community especially when living in the county vs. the city.”

- Full-time resident of 21-40 years, age 65-74

One of the greatest challenges facing Park County is people figuring out how to work together. Although the 2022 Flood certainly showed that county residents can and will come together in times of need, only 16% of this year's survey respondents believe that people will put their political differences aside and work together.
